

# WHAT'S APP

for

 COACH  
CORE

# Why We're Using Whatsapp:

It will help us send big announcements to everyone

It's a platform most people are using already

It's more social and quick to use than email

We can send and store media more easily

We can give quick guidance and support each other

It will help towards creating long-lasting networks

# We'll be using WhatsApp Communities with our programs moving forward

- **Communities** connect multiple group chats together under one umbrella to organize group conversations on WhatsApp.
- We've made group chats for each location under the umbrella of 'Coach Core', and each apprentice and LC in that area is invited to join.
- Alongside the group chat relevant to your area, you'll be a part of an announcements thread.

# Next Steps

You'll be invited to join the group chat via a link from your LC.

You can still access any previous chats you had, but please don't use old ones moving forward.

Introduce yourself and use WhatsApp for any normal messaging to do with your apprenticeship.

Watch out for any updates/requests from us in the 'announcements' group chat.

# Important Things Before You Get Started

- If you don't want your phone number seen by others, you'll need to change your settings: Go to go to community/group info, and click on phone number privacy. Your phone number will no longer be visible in the chat to others unless already saved.
- Adhere to the rules **at all times** when using our group chats.
- If you wish to have your own private groups to share personal content, then you are free to do so but we won't be monitoring those groups. We ask you to keep Coach Core group chats active regardless of conversations being elsewhere.
- If you see anyone breaking the guidelines, please actively report this to an admin for us to investigate
